AYES 100 - E1
Mini Dumpling Production Machine

MINI DUMPLING PRODUCTION MACHINE, It is a compact dumpling machine developed for low- and medium-scale production needs. Thanks to its efficient working structure and precise production capability, it ensures the standard and high-quality production of different types of dumplings.

The system, designed with a modern engineering approach, supports the production processes of businesses by offering ease of use and reliable performance.

TECHNICAL SPECIFICATIONS	VALUE
Hourly Production	15 - 20 kg
Dough Sheet Width	100 mm
Total Power	2 kW
Total Weight	300 kg
Width / Length / Height	1000 x 1000 x 1300 mm

AYES KBH 750
Kol Böreği Line

AYES KOL BÖREK LINE, Our line is a group of machines consisting of many different stations. These groups include modular machines such as thinning, feeding, oiling, cutting, multiple thinning, flouring, and similar machines according to the required process.
AYES BÖREK LINE lines are modularly designed for the production of products such as kol böreği, water börek, lavash, yufka, and similar products.
Our machine groups have a food-grade and easy-to-clean structure. The equipment can be easily assembled and disassembled, providing a strong solution for the needs of facilities.

TECHNICAL SPECIFICATIONS	VALUE
Hourly Production	500-750 kg
Dough Sheet Width	1100-1400 mm
Total Power	20 kW
Total Weight	5000 kg
Width / Length / Height	1800 x 20000 x 2000 mm

AYES MKB-150
Mini Kol Böreği Line

MINI KOL BÖREK LINE, It facilitates the kol böreği production processes by providing standardized, fast, and efficient production. While helping to maintain the product form and quality at every stage of production, its structure suitable for mass production saves time and labor. With its compact design, durable structure, and high production capacity, it offers a practical and reliable solution for professional production facilities.

TECHNICAL SPECIFICATIONS	VALUE
Hourly Production	150 kg
Weight	1200 kg
Total Power	12 kW/h
Width / Length / Height	1500 x 5000 x 1200 mm

AYES 540 - E1
Automatic Dumpling and Tortellini Machine

AUTOMATIC DUMPLING AND TORTELLINI MACHINE, Ayes Mühendislik, which is increasingly in demand for high-efficiency production and has rapidly entered the filled pasta and food industry, offers new concept machines designed for companies seeking high production speeds today, capable of producing cappelletti, tortelloni, and dumplings in various formats through its mechanical and machine management system.

TECHNICAL SPECIFICATIONS	VALUE
Hourly Production	400 - 500 kg
Dough Sheet Width	540 mm
Total Power	21 kW
Total Weight	3500 kg
Width / Length / Height	1400 x 1700 x 2800 mm

AYES DM-100
Slicing Machine

AYES SLICING MACHINE, It is used for slicing baklava products arranged on trays into the desired dimensions. Our machine is designed to perform precise slicing without compromising the structure and quality of the product. The blades and surfaces that come into contact with food are made of stainless steel and food-grade materials. In our PLC-controlled machine, mold dimensions can be changed according to customer requirements, and new molds can be added. The molds offer easy installation and cleaning. Thanks to safety sensors and switches, safe operation is ensured while preserving the natural structure of the sliced products.

Not: AYES DM-100
It offers the option of using a single or double group according to production capacity.

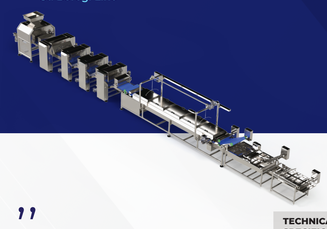
TECHNICAL SPECIFICATIONS	VALUE
Hourly Production	200 - 250 tepsi
Total Weight (Single)	400 kg
Total Power	0,75 - 1,5 kW
Single Machine	800 x 800 x 1350 mm
Double Machine	800 x 1600 x 1350 mm

AYES HM - 400
Dough Machine

AYES DOUGH MACHINE, It has been developed for facilities requiring higher production capacity. Thanks to its double structure, it enables preparation processes to be carried out faster and more efficiently, providing continuity and operational convenience in the production line.

TECHNICAL SPECIFICATIONS	VALUE
Hourly Production	1000 kg
Total Power	25 kW/h
Width / Length / Height	2500 x 3700 x 2000 mm

AYES SBH-400
Su Böreği Line



AYES SU BÖREĞİ LINE, It is designed to make traditional water börek production fast, standardized, and efficient on an industrial scale. By bringing together different stages of the production process on a single line, it helps maintain product quality and production continuity. With its robust structure and design suitable for high production capacity, it offers a reliable solution for professional production facilities.

TECHNICAL SPECIFICATIONS	VALUE
Hourly Production	300 - 400 kg
Total Weight	3500 kg
Dough Sheet Width	500 mm
Total Power	20 kW/h
Width / Length / Height	1600 x 16500 x 1900 mm

AYES 400 - E1
Automatic Dumpling and Tortellini Machine

AUTOMATIC DUMPLING AND TORTELLINI MACHINE, It combines dumpling and tortellini production processes in a single system, offering high efficiency and production continuity. With a production capacity of 300-400 kg per hour, a dough width of 400 mm, and a fully automated structure, it provides a robust solution for the needs of industrial facilities.

TECHNICAL SPECIFICATIONS	VALUE
Hourly Production	300 - 400 kg
Dough Sheet Width	400 mm
Total Power	18 kW
Total Weight	3200 kg
Width / Length / Height	1400 x 1700 x 2800 mm

AYES YHM-300
Horizontal Dough Mixer

AYES HORIZONTAL DOUGH MIXER, It provides speed, quality, and efficiency in the production process by ensuring that the dough is kneaded to a homogeneous and ideal consistency. Thanks to its strong and durable structure, it delivers stable performance under intensive production conditions while helping to efficiently prepare different types of dough. With its structure compatible with high-capacity production processes, it saves time and labor, offering a reliable solution for professional production facilities.

TECHNICAL SPECIFICATIONS	VALUE
Capacity	300 kg
Weight	3500 kg
Total Power	30 kW/h
Width / Length / Height	2500 x 1000 x 2500 mm

AYES HM-500
Dough Machine

AYES DOUGH MACHINE, It is designed to ensure that pre-production preparation processes are carried out in an organized, fast, and efficient manner. With its compact structure, it saves space in the production area while contributing to uninterrupted and standardized production processes.

TECHNICAL SPECIFICATIONS	VALUE
Hourly Production	500 kg
Total Power	15 kW/h
Width / Length / Height	2500 x 2700 x 2000 mm

AYES KESTART

AYES KESTART, It is designed to ensure that products are prepared in an organized, standardized, and efficient manner during the production process. Thanks to its robust structure and operating system compatible with the production line, it provides operational convenience while offering a stable and reliable solution at high production speeds.

TECHNICAL SPECIFICATIONS	VALUE
Total Weight	750 kg
Total Power	2,5 kW/h
Width / Length / Height	1400 x 3900 x 2550 mm
